

# KL731

## KC700 Series conventional optical smoke detector

### General

---

The KL731 is a conventional optical smoke detector.

With outstanding performance, efficiency and durability, the KL700 series conventional fire detectors is the ideal solution for every installation. They are designed specifically for use with Kilsen conventional fire panels, but may also be connected to most 3rd party industry standard conventional fire panels.

### A fire detector for every need

---

With an attractive design and advanced features, these fire detectors have been designed to cope with difficult and even extreme situations. The series comprises a range of detectors including optical and heat detectors, supporting a universal base that suits every application.

A range of bases are available in standard and deep base variants, including relay bases for low voltage (12 VDC) applications and even supports a base variant that compensates for uneven mounting surfaces.

All bases are provided with an integral locking mechanism for extra security, and all detectors support the connection of a remote indicator.

### KL731 Photoelectric Smoke Detector

---

These detectors use the Tyndall effect of smoke in the chamber to detect a fire. It can detect a smouldering fire (without flames). The KL731 detectors are normally used in areas where possible fires generate visible smoke e.g. plastics, polystyrene, PVC, etc.

### Details

---

- An ultra-fine grid prevents the ingress of dust and insects in smoke detectors
- Attractive, low-profile design
- EN54 approved and CPR Certified
- Innovative base option to compensate for uneven surfaces

# KL731

## KC700 Series conventional optical smoke detector

### Technical specifications

#### Electrical

Operating voltage	9 to 28 VDC
Current consumption	Quiescent at 24 VDC 85 $\mu$ A Alarm at 24 VDC <100 mA

#### Physical

Physical dimensions	45 x 99 mm (h x Ø)
Colour	White (RAL 9010-P)
Mounting type	Base mount

#### Environmental

Operating temperature	-10 to +70°C
Storage temperature	-10 to +70°C
Relative humidity	0 to 95% noncondensing
Environment	Indoor
IP rating	IP42

#### Regulatory

Certification	EN54-7
---------------	--------

#### Remote indicator output

<100 mA
---------

#### Number of detectors per zone

20
----

#### Approvals\*

CPD/R
-------
